
Einladung zu einem Vortrag
im Rahmen des DK-Seminars des Karl Popper Kollegs von

Prof. Helmut Prodinger

Stellenbosch University, South Africa

zum Thema

Rice's Method and Combinatorial Identities

Ort: I.2.01 der Universität Klagenfurt

Zeit: Mittwoch, 14. Dezember 2016, um 10:00 Uhr s.t.

Kurzfassung:

The method in question belongs to the analytic toolkit of the Analysis of Algorithms. It is based on replacing a certain alternating sum by a contour integral which is evaluated asymptotically via residues. It can also be used to prove exact formulas (identities), in which case the framework of contour integrals can be replaced by elementary partial fraction decomposition.

Das Institut für Mathematik freut sich auf Ihren Besuch.
