Einladung zu einem Vortrag von

Robert Skiba

Nicolaus Copernicus University in Torun
Faculty of Mathematics and Computer Science
Torun, Poland

zum Thema

Periodic solutions of differential equations without uniqueness

Ort: I.2.01 der Universität Klagenfurt
Zeit: Mittwoch, 4. Oktober 2017, um 10:00 – 11:00 Uhr

Kurzfassung:

The main purpose of my talk is to present how to study the problem of the existence of periodic solutions by using the topological degree for set-valued maps with compact values. All needed concepts will be described in detail during the talk.

Das Institut für Mathematik freut sich auf Ihren Besuch.
